Project Proposal

Recipe

Recipes are important because they contain the information necessary to make a dish properly.

As with any set of instructions and ingredients, you rely on them to give you all of the information you need. It is this tool which allows the chef to train and replicate his skill to his staff.

Technology and Tool

Technology

- React Native
- Node Js
- Express framework
- MySQL
- Redux
- Ngrok

Tool

Feature

- Home Screen
- Category
- Category Detail
- View Detail
- Add / Update / Delete Recipe

Done & Not done

Done

- Home Screen
- Category
- Category Detail
- View Detail
- Add / Delete Recipe

Not done

- Update Recipe
- Form Validation

DEMO
